Allowable Subject Matter

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 1 and 5, more particularly define the structure of an optical disk, which comprises of a spatial features (notches, bumps, etc).

When a mark (or space) is written next to the spatial feature, and the mark (space) is spatially centered relative to the spatial feature, and the mark (or space) is read in a compatible disk drive, a resulting binary read data signal is not affected. When the mark (or space) is positioned so that the end of the mark is adjacent to the spatial feature and the mark is read in a compatible disk drive, a resulting binary read signal is affected. These particulars, combined with the remaining claim elements, are not suggested in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
